---

Tasmanians have asked their most pressing climate change questions through *Curious Climate Tasmania* and can find out the answers at four live events to be held around Tasmania in August as part of [National Science Week](#).

Attendees have the chance to speak face-to-face with some of Tasmania's top scientists about the climate change issues most important to Tasmanians.

Answers will be revealed to some of the most popular questions and topics submitted and there'll be live Q&As with the science team.

Launched in May, the project is led by the University's Centre for Marine Socioecology (CMS) in collaboration with IMAS, the Tasmanian Institute of Agriculture (TIA), ABC Hobart and the CSIRO.

Funded by a National Science Week grant, the project aims to develop engaging, public-powered science communication, bridging the gap between experts and audiences on a controversial topic with credible and relevant information.

During the two-week Curious Climate callout in June, Tasmanians asked more than 200
