Under pressure: scientists call for urgent conservation action to save Maugean skate

The evidence is in and s

“While funding for the monitoring project does not currently extend beyond 2023, this study shows the value in being able to track the Maugean skate’s population changes through time and in response to management action. Captive breeding to develop an ‘insurance’ population should also be considered.”

This project was supported with funding from the Tasmanian Government through the IMAS Sustainable Marine Research Collaboration Agreement (SMRCA).
